After moving the offer, buyer or seller can confirm the offer with a click on C.

Fig. 10

900

Confirmation proceeds as before.

Fig. 11

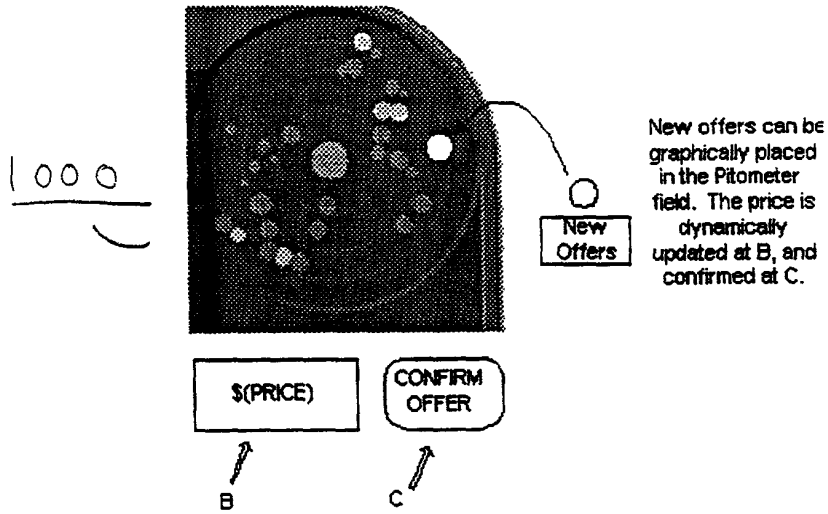

Fig. 12

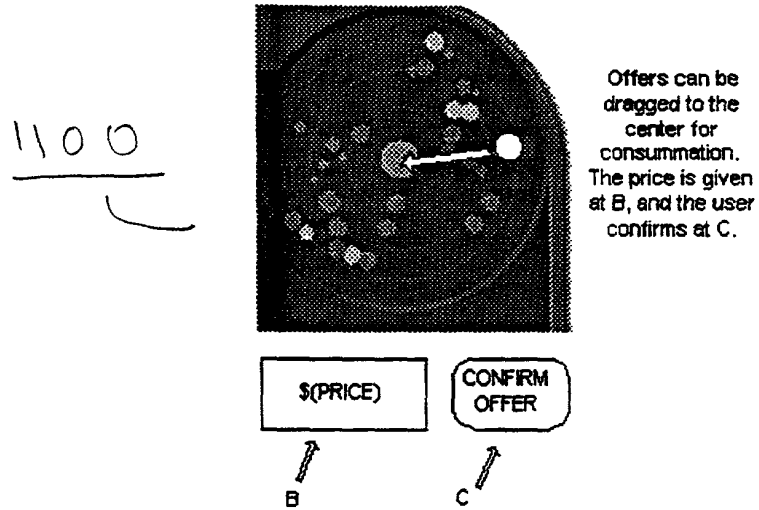

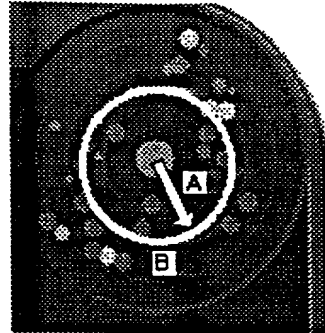

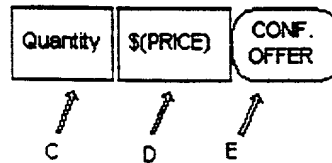

Fig. 13

1200

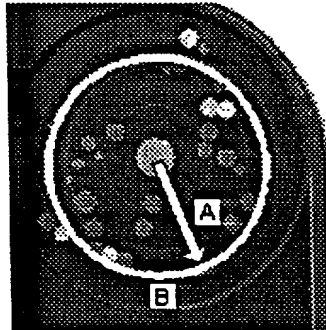

As the buyer or seller in center drags outward (see A) from the center, the display below dynamically updates number of offers and total price captured inside the ring B.

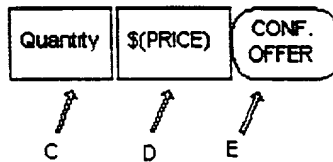

Quantity and price are dynamically updated at C and D. Confirmation proceeds as usual at E.

Fig. 14

1300

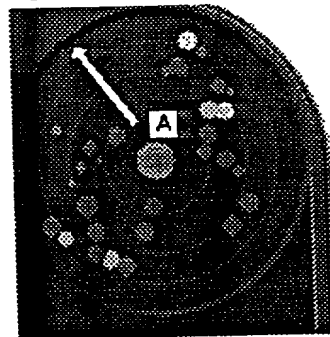

In this example, the generated ring has a greater diameter, capturing a greater number of offers than are captured in figure 12.

Quantity and price are again dynamically updated at C and D. Confirmation takes place at E.

1400

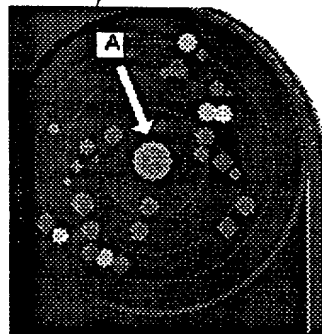

Confirmation is given at C.
